## Summary

I am a Full Stack Engineer by profession and also a postgrad student in IT with a major in Information Security.

As an individual, I am an Enthusiastic Learner. I am always ready for challenges that make me think out of the box. Other than that, I do keep an interest in illustrations, and digital arts. I have a noticeable performance in the same.

My Expertise:

web application development, web UI design, full-stack development, Linux, Apache Server, MySQL, PHP, and information security.

Key Differentiators:

leadership, team player, tactical and strategic planning

## Experience

### Web Application Developer

Maanv Group

Feb 2023 - Present (8 months)

I am a part-time freelancer who takes freelance projects ranging from Static Websites to Web Applications, depending on the requirements.

My key responsibilities as a freelancer are:

- Have a thorough understanding of the requirements.
- Suggest to the client the best possible solution suitable for the problem statement.
- Plan the project ahead of time and ensure it delivers in the given time-bound.
- Develop a quality project and ensure it does not go too heavy on the client's pocket.
- Collaborate with other talented artists, designers, editors, and developers and split down the tasks between them and make a parallel process chain to reduce delivery time.
- Work as a lead and track (and manage) the overall progress of individual tasks given to each collaborator of the project.
- At last, make a suitable post-delivery maintenance plan (if requested by the client) for maintaining the project afterward.

### Full Stack Engineer

FashionTV India

Nov 2021 - Feb 2023 (1 year 4 months)

- Increased the synchronization and standardization in the Software Development process by 50%-60% by incorporating some Web Development standards and using PHP Frameworks.
- Increased the overall performance of the existing server by decreasing the server load by 70-80%

- Introduced some standards of development, and pipelining the CI/CD via online platforms to increase the productivity of the Developer's Team by 30-40%

## **Associate Developer**

FashionTV India

Sep 2021 - Nov 2021 (3 months)

- Used the modern CSS Animation and Transitions to improve the User Experience of the Websites
- Incorporated some creative ideas in the Frontend Of the Websites

## **Full Stack Engineer**

Alogic Data

Sep 2020 - Sep 2021 (1 year 1 month)

- Increased the B2B Product Development and Support concurrency by 40-50% by developing and maintaining multiple product-based projects simultaneously for some of the well-known companies in the Pharmaceutical Sectors in India.

## **Web Developer**

Maanv Group

Jul 2018 - Sep 2020 (2 years 3 months)

## **Information Technology Trainee**

Alogic Data

Mar 2020 - Aug 2020 (6 months)

- Entered this company as the only in-house web developer.
- Took some risky tactical decisions out of which 70% of decisions were targetted to add immediate value to the company.
- Understood some key elements in the "practical" SDLC Approach, and soft skills for Client Handling.
